Where:

We source the fruit for this wine from low yielding vineyards in Mendoza's Uco Valley. 1,000 metre plus altitude helps the variety ripens slowly and ensures the grapes alluring aromatics are preserved. This is crafted with respect for the wonderful fruit we have sourced. Gentle extraction techniques are used to capture the juicy vibrant red and blackcurrant fruits which are hallmarks of this variety, but care is also taken to preserve the violet scent which can make Malbec oh so pretty
